DETAILED ACTION

Response to Arguments

1. Applicant's arguments, see page 10, filed 1/18/06, with respect to the rejection of claims 15-18, 20 and 22 under 35 U.S.C. 112, second paragraph (mistakenly rejected as claims 15-19 and 21 in the previous Office action), have been fully considered and are persuasive. The rejection of claims 15-18, 20 and 22 under 35 U.S.C. 112, second paragraph, has been withdrawn.

2. Applicant's arguments, see page 11, filed 1/18/06, with respect to the rejection(s) of claim(s) 15-22 under 35 U.S.C. 102102(b) as being anticipated by Mizoguchi et al. have been fully considered and are persuasive. Therefore, the rejection has been withdrawn. However, upon further consideration, a new ground(s) of rejection is made in view of Applicant's disclosure of prior art.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

4. Claims 15-22 are rejected under 35 U.S.C. 102(a) as being anticipated by Applicant's disclosure of prior art.

Regarding claims 15-22, Applicant discloses a prior art known synchronization preamble in Figure 1 for use in an OFDM transmission system having a transmitter for transmitting the preamble, where the preamble has a first part (A-FIELD) designed for a coarse frame detection

Art Unit: 2611

and AGC, a second part (B-FIELD) following the first part in the time domain for timing and frequency synchronization, and a third part (C-FIELD) following the second part in the time domain for fine synchronization (page 1, lines 13-20 of the instant application), where each of the first and second parts contain 12 complex symbols mapped on every four subcarriers of all available 52 subcarriers of the OFDM system (B-FIELD: subcarriers $+4$, $+8$, $+12$, $+16$, $+20$, $+24$; C-FIELD: subcarriers $+2$, $+6$, $+10$, $+14$, $+18$, $+22$) (see page 2, lines 3-23 of the instant application), and the third part contains 52 symbols, each set to 1 or -1, mapped on all available 52 subcarriers (page 1, line 29 to page 2, line 1 of instant application), where a time domain signal is generated by performing an IFFT on the frequency domain sequences (i.e. 64 point IFFT – page 2, line 18 of instant application), where the time domain signal is inherently transmitted from a transmitter to a receiver, and where the 12 complex symbols in the frequency domain sequences of the first and second parts are set so that a synchronization performed in the receiver side includes correlating the frequency domain sequences of the first and second parts to obtain the correlation result shown in prior art Figure 3 (page 8, line 33 to page 9, line 4 of instant application).

Conclusion

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after

Art Unit: 2611

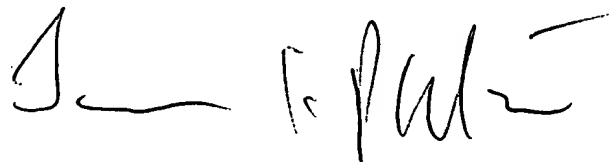

the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
